

Walvoil SVM980 Hydraulic Pilot Control Valve

The SVM980 manages and regulates high flow rates due to large diameters of spools.

WALVOIL S.P.A. — FEBRUARY 1, 2019

WALVOIL

SVM980 is Walvoil's latest hydraulic pilot control valve for hydraulic joysticks with a differential area.

- Provides lowest operating forces for operators among entire range of hydraulic pilot control valves
- Manages and regulates high flow rates due to large diameters of spools
- Change to traditional architecture used for other similar products offers innovative, original, solid and reliable product
- Completely adaptable to customer needs by the modularity of fixing flanges and compatibility with all handles of Walvoil catalog
